

Scripter4 2.0 beta

1. INTRODUCTION

Scripter4 2.0 is a script editor for Tomb Raider IV and Tomb Raider Chronicles games. It edit directly the DAT files of the game, so you haven't to bore yourself with text strings that doesn't match the script.txt file or similar boring things.

It's only a beta, so test it and report bugs and suggestions on www.aspidetr.com, forum.videogame.it or www.trle.net .

2. TR5 SUPPORT

Version 2.0 supports also TR5 scripts. Scripter4 will ask you every time you open a script if it is for TR4 or TR5.

3. MULTILANGUAGE STRINGS EDITOR

n°	Italian	English (UK)	German	French	Spanish
23	La Citt... dei morti	City Of The Dead	Die Stadt der Toten	La Cit, des Morts	La C

38	Tempio di Horus	Temple Of Horus	Der Tempel des Horus	Le temple d'Horus	Temp
...

Below the table are five language selection boxes:

- Italian: Sotterranei della Sfinge
- English (UK): Underneath The Sphinx
- German: Der Tempel im Tal
- French: Dans les entrailles du Sphinx
- Spanish: Bajo la Esfinge

At the bottom right are "Cancel" and "OK" buttons.

When you open a script, Scripter4 will ask you what strings file to load. This will be the main strings set.

Well, when you open the strings editor, Scripter4 will search other strings files in the same folder, and loads in the editor the files that it finds. Watch the picture to see how it works.

4. CONTEXT MENUS AND KEYBOARD SHORTCUTS

In the levels and filenames list box there's also a context menu, with only a voice, "Delete All". Use it to delete all items of the list box quickly.

You can also select an item of the list box and press "Del" key

5. LANGUAGE FILES

Scripter4 2.0 can be translated in whatever language you want. Now the archive contains a language file for Italian and one for English. If you want to change the language, copy the file from its folder ("Italian", "English" in "Language Files" folder) to Scripter4 2.0 folder. The default file is for English.
